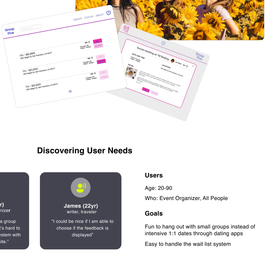
3 months

Role
Ideation, Design

Stakeholders
1 engineer, 1 product designer



Discovering User Needs

Taryn (34yr)
Tech group organizer

"We want to have a group meeting locally but it's hard to manage a wait list system with an online website."

James (22yr)
writer, learner

"I could be nice if I am able to choose if the feedback is displayed"

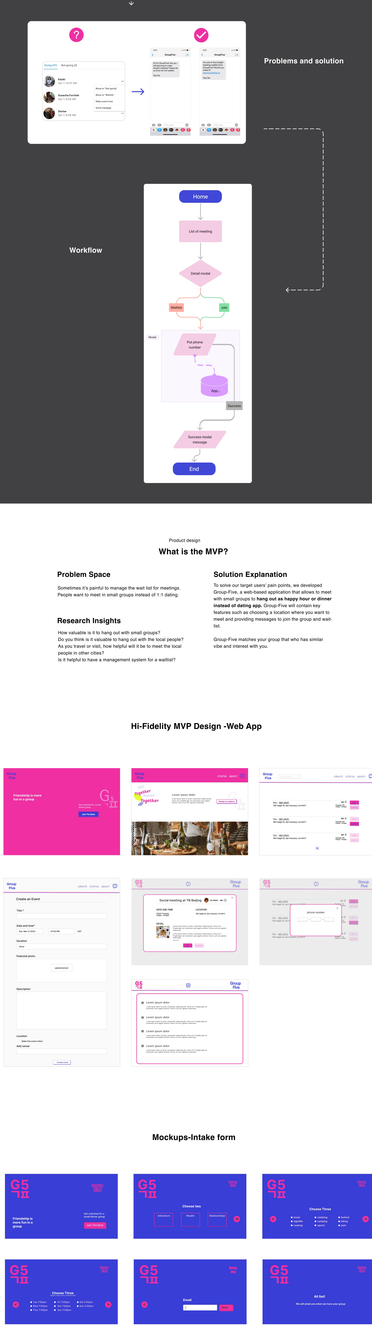
Users

Age: 20-90
Who: Event Organizer, All People

Goals

Fun to hang out with small groups instead of intensive 1:1 dates through dating apps
Easy to handle the wait list system

Research, Brainstorms, Workflow and Wireframes



Product design

What is the MVP?

Problem Space

Sometimes it's painful to manage the wait list for meetings. People want to meet in small groups instead of 1:1 dating.

Research Insights

How valuable is it to hang out with small groups?
Do you think is it valuable to hang out with the local people?
As you travel or visit, how helpful will it be to meet the local people in other cities?
Is it helpful to have a management system for a waitlist?

Solution Explanation

To solve our target users' pain points, we developed Group-Five, a web-based application that allows to meet with small groups to **hang out as happy hour or dinner instead of dating app.** Group-Five will contain key features such as choosing a location where you want to meet and providing messages to join the group and wait-list.

Group-Five matches your group that who has similar vibe and interest with you.
